Volume 33, 1989

Compiled by Edward Swanson

General Procedures Used in Compiling the Index

The following types of entries are included:
a. authors—of articles, reviews, and letters
b. titles—of articles and of articles about which letters were published
c. subjects—of articles and of books reviewed

Subject entries for individuals are identified by "(*about*)"; letters are identified by "(*c*)."

Reviews are indexed by name of reviewer and by subject of the work reviewed, identified by "(*r*)." They are also listed by title under the heading "Books reviewed."

Entries are arranged word by word following the "file-as-spelled" principle. Numbers are arranged before alphabetical characters; acronyms without internal punctuation are arranged as words.
